General Comment

Our Mattawoman Creek here in Charles County is under attack and needs to be saved from overdevelopment. There has been an area here designated as a development district larger than Washington D.C, most of which is in the Mattawoman watershed.

When watersheds, like the Mattawoman fail so will the Chesapeake Bay.

You now have the unique opportunity to do something about it, and the time has come to put strong, enforceable water safety standards in place to protect our homes, support our economy and ensure that our streams and rivers are healthy today and for our children's future

I urge you to develop a strong pollution diet in Maryland that holds us all accountable for the pollution that is harming our wildlife and damaging our local economy, the bay and watersheds like the Mattawoman. It is imperative that these plans address all sources of pollution and demonstrates how reductions will be gained. Citizens across this state and the region need your help to keep our water clean and protected.
